

SUPRA XL ANNORUM RCA AUDIO

High-end Interconnect with gold-plated RCA plugs

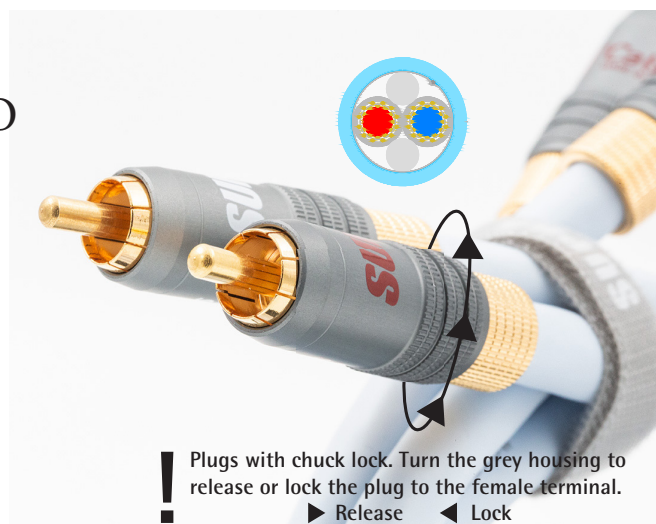

Gauge: 1.5mm² / AWG 15

Rev. date: 2026-06-04

Customs tariff no: 8544429010

Country or origin: Sweden

- Transparent and dynamic sound
- Minimal phase-shift reactance
- Extremely low microphonic effect
- Slim and robust 24K gold-plated RCA connectors

XL Annorum Interconnect RCA - Transparent and dynamic

The XL Annorum Interconnect is based on technologies from both the XL Annorum speaker cable and the Sword Interconnect series. Its conductor geometry is derived from the Sword-I, while the conductor material, damping fillers, and rubberized jacket originate from the XL Annorum speaker cable. The rubber-based damping material effectively suppresses microphonic effects caused by mechanical vibration. During testing, no measurable or audible microphony was detected.

The cable combines the low phase-shift characteristics of the Sword design with a more cost-effective conductor construction. Unlike the flagship Sword-I, it does not use lacquered Litz conductors, which are significantly more complex and expensive to manufacture. The construction consists of two bifilar-wound conductors, each made from 6 + 6 strands of bare 5N oxygen-free copper wound around a central polymer core. This geometry provides favourable capacitance characteristics and helps reduce skin effect. A chemically stable PP dielectric minimizes conductor degradation over time. The conductors are twisted together with damping fillers, fully shielded with aluminium foil, and protected by a durable rubberized outer jacket.

In terms of performance and specification, the XL Annorum Interconnect is positioned between the SUPRA EFF-I and the flagship SUPRA Sword-I.

CONSTRUCTION

Cable:	XL Annorum Interconnect
Conductors (x2)	2x6x0.40 (Bare OFC) spun around PE/PP-filler
Area:	2x1.5mm ² / AWG 15
Isolation:	PP/PE mix, D=3mm
Parts:	Twisted
Screen:	Common Alu/Pet foli, 100%, Semi-balanced, the screen is only connected at the source end
Jacket:	Rubber based PVC GA54, round, D=8mm
Colour:	Ice Blue
Interconnect:	Stereo, 2 > 2 plugs, Right = red, left = black
Plugs:	RCA-8SL
- Material:	Gold plated Copper alloy
- Wire connection:	Soldering, solder tin Almit 34 Super
- Jack connection:	Squeeze lock (SL)
Signal direction:	Follow the arrows > Source > Receiver
Packning:	25 x 21.5 x 4.8cm
Custom lengths are made upon request.
